	Urgent	Not Urgent
Important	**Do - (Your MVP)** ● Choose sources ● Write the fetcher that pulls title, short description and link ● Trigger it on the first startup of the day ● Choose between a local HTML page or a desktop widget for the display	**Schedule - (For V2.0+)** ● Higher quality descriptions by sending the article to an LLM ● Removing dupes so stories aren't repeated, using a cache ● Dismiss, pin, remind me later options on notes
Not Important	**Delegate - (Use a library)** ● Parsing (RSS feeds, BeautifulSoup) ● Startup hook (launchd, Task Scheduler or systemd) ● Once a day logic using a last run date file.	**Delete - (Cut it)** ● Custom crawlers for sites that already offer feeds. ● Fancy animations and theming options ● Supporting dozens of sources at launch
